

Cristian Camilo Gamboa Vargas

Senior Full-Stack Engineer | Python, Go, Java, C#, JavaScript, TypeScript

📞 57 3150165493 @ criscamilo1016@outlook.com 🔗 linkedin.com/in/cristian-c-gamboa/ 📍 Bogota, Colombia

SUMMARY

Full Stack Engineer with **8+ years** of **building scalable backend systems, designing data pipelines, and improving DevOps practices**. Skilled in **Python, Go, Java, and C#**, with a focus on **cloud-native development, microservices, and secure API design**. Hands-on experience with **ETL workflows, real-time streaming, and CI/CD pipelines** using **Kafka, Docker, Kubernetes, Terraform, and Jenkins**. Known for improving system performance, reliability, and developer productivity through automation and optimization. Supporter of **Agile and DevOps** culture, with a passion for mentoring and sharing knowledge.

SKILLS

Languages

Python, Go, Java, C#, TypeScript, JavaScript, SQL, Bash

Backend/Frontend Frameworks

FastAPI, Flask, Django, Spring Boot, Kotlin, .NET Core, NestJS, Express.js, Node.js, React, Angular, Vue.js

Data Engineering & Databases

Apache Kafka, Redis Streams, Airflow, Pandas, Spark, NumPy, PostgreSQL, MongoDB, Redis, DynamoDB, MySQL

Cloud Platforms

AWS (EC2, Lambda, S3, Glue), Azure (Functions, App Services, Event Hubs), Heroku, GCP

DevOps Tools

Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, Azure Pipelines, Ansible

Authentication & Testing Tools

OAuth2, JWT, RBAC, Keycloak, Pytest, Postman, Jest, Cypress

EXPERIENCE

03/2025 - 02/2026

Bogotá, Colombia

Senior Web Developer

CodeBright

[Code]
Bright

- Designed and maintained scalable **back-end APIs** using **Java (Spring Boot)**, **FastAPI** and **Django REST Framework**, improving application performance by **25%**
- Architected data models and deployed **microservices** using **Docker** and **Kubernetes** across **AWS EKS clusters**, ensuring **99.99%** uptime
- Built event-driven architectures with **Kafka** and **RabbitMQ**, enhancing system scalability
- Building, iterating, and testing scalable, back-end APIs for web applications to deliver high availability and **reduce API response latency by 25%**
- Automated infrastructure provisioning using **Terraform** on **AWS** and **Azure** to maintain consistent environments across development, staging, and production
- Collaborating on **Agile development** processes to manage technical debt, deliver bi-weekly sprints on time, and **achieve 95% sprint deliverable success rates**

EXPERIENCE

08/2023 - 02/2025

New York, US

Full Stack Developer

IBM

- Led development of microservices using **Python (FastAPI)**, **Java (Spring Boot)** and **Go**, supporting high-throughput financial and analytics workloads
- Designed and deployed streaming data pipelines with **Kafka** and **Redis Streams**, enabling near **real-time data processing** with improved fault tolerance
- Refactored legacy monolith services into **C#/.NET Core microservices**, increasing maintainability and deployment velocity
- Developed high-performance **ETL jobs** using **Python** and deployed them using **Airflow** and **Dockerized workflows**
- Engineered and managed secure **RESTful APIs** using **JWT** and **OAuth2**, supporting **multi-tenant SaaS architecture**
- Revamped client-facing **Angular**-based dashboards, integrating **RxJS** for scalable state management and custom UI components, improving performance and user engagement
- Managed the migration from **AngularJS** to **React.js** using a strangler pattern approach, cutting technical debt by **45%** while ensuring seamless transitions
- Created monitoring and alerting dashboards with **Prometheus** and **Grafana** to monitor application performance and **resource usage**

10/2020 - 07/2023

California, US

Backend Developer

Cisco

- Built robust backend services using **Python**, **Java** and **Go**, serving critical endpoints with **99.99%** uptime
- Designed a **GraphQL** API layer in **Python** to unify disparate data sources, simplifying **data integration**
- Created custom data loaders in **Python**, **Java** and **Go** to ingest and normalize streaming data from external vendors
- Developed role-based access control and authentication modules using **C#** and **OAuth2**
- Implemented **Redis caching** and **asynchronous** task queues to reduce request latency and enhance user experience
- Architected and deployed microservices using **Docker** and **Kubernetes**, improving system modularity
- Set up **CI/CD pipelines** using **Jenkins** and **GitLab CI**, reducing deployment cycles from 1 hour to 10 minutes

06/2017 - 09/2020

California, US

Frontend Developer

Adobe

- Architected scalable full-stack systems using **React.js** and **Next.js** for **SSR (Server-Side Rendering)** and **SSG (Static Site Generation)**, reducing page load times by **60%** and improving Google Core Web Vitals and **SEO performance**
- Engineered reusable **React** components with drag-and-drop functionality, leveraging hooks to minimize re-rendering and **improve performance by 40%**
- Collaborated with design and **UX** teams via **Figma** and **Storybook** to deliver pixel-perfect, mobile-responsive UIs using **React.js** and **TailwindCSS**
- Designed secure internal APIs using **OAuth2** and token-based authentication to support internal tools
- Created **ETL** automation scripts in **Python** and **Java** to extract and clean data from legacy **SQL** databases
- Delivered enterprise-grade applications using **Go**, **Java (Spring Boot)**, and **C#/.NET**

EDUCATION

2013 - 2017

California, US

Bachelor of Science BS, Computer Science

Stanford University
