Senior Full Stack Engineer

Frontend-focused Full Stack Engineer with 10+ years of experience designing, developing, and optimizing **full-featured web applications**. Specialized in modern JavaScript frameworks (**React, Vue, Angular**) for building interactive, user-centric **frontends**, and proficient in **backend** development with **Node.js, Python, and Java**, including RESTful APIs, database integration, and microservices architectures

Core Skills

JavaScript (React.js, Next.js, Vue.js, Angular), TypeScript, HTML5, CSS3, TailwindCSS, DaisyUI, Storybook, API Integration, Node.js, Python (Django, FastAPI), PHP (Laravel, Yii)

Additional Skills

Git, MongoDB, PostgreSQL, SQL, AWS (ECS, Lambda, RDS, S3), Jenkins, GitHub Actions Webpack, Docker, Microservices, RESTful APIs, GraphQL, OAuth/JWT Authentication, Azure, Google Cloud, Blockchain Integrations (Solidity, Hyperledger),

Professional Experience

Senior Frontend Engineer | PillarMarkets | NY, US (Remote)

July 2022 – May 2025

- Led the development of frontend (Next.js, DaisyUI, GraphQL, TailwindCSS) services to enhance platform performance and user experience.
- Designed and implemented highly interactive and responsive user interfaces using Next.js and TailwindCSS, driving improved user satisfaction and platform adoption.
- Built scalable RESTful APIs consumed by Next.js frontend and mobile applications, integrating frontend with secure backend services.
- Worked on integrating frontend with backend services for CRM, analytics, and investor management, ensuring seamless data flow and real-time analytics.
- Contributed to frontend UI/UX improvements using DaisyUI, ensuring consistency and usability across platform.

Senior Full-Stack Engineer | LimeSurvey | Hamburg, Germany (Remote)
Oct 2020 – Apr 2022

- Contributed to LimeSurvey's open-source full-stack platform, focusing on both backend (PHP Yii framework) and frontend (React, Storybook) development.
- Developed and maintained dynamic user interfaces in React, enhancing survey creation, response tracking, and data visualization for users.
- Optimized backend integrations and frontend data handling for complex survey logic, reducing load times and improving user interaction.
- Led the implementation of Storybook for UI component development, improving collaboration between frontend and backend teams.
- Ensured seamless user experience by collaborating closely with frontend and backend teams for real-time survey data reporting and export features.

Full-Stack Engineer | TheTrackAPP |U.S (Contract, Remote)
Jul 2018 – Jun 2020

- Engineered a cross-platform calendar application using Electron and React, focusing on performance optimization and user experience.
- Developed features for efficient event creation, scheduling, and real-time updates, ensuring seamless synchronization across platforms.
- Collaborated with the team to design an intuitive user interface, enhancing usability and accessibility for end-users.

Junior Full-Stack Developer | GiftCash |Canada (Contract, Remote)
Feb 2017 – Apr 2018

- Contributed to the development of GiftCash's web platform by building and maintaining backend systems using PHP (Laravel) and creating interactive user interfaces with React.js.
- Worked on the integration of secure payment systems, optimizing backend API performance to ensure efficient processing of gift card transactions and seamless user experience.
- Collaborated with the team to modularize and scale frontend components, improving application performance and enhancing the overall customer journey on the platform.

Education

Universidad Distrital Francisco José de Caldas

Bachelor of System Engineering & Computer Science | Aug 2013 – May 2017
