WILLIAMKENCEL

Senior Software Engineer

1 (929) 464-5733 • williamkencel@engineer.com •linkedin.com/in/william-b-kencel-9a9976399•Greenwich, CT

SUMMARY

Software engineer with **10+ years** of experience building scalable applications and backend systems using **Python** (**Django**, **Flask**, **FastAPI**). Skilled in designing RESTful APIs, asynchronous services, and high-performance architectures. Experienced in applying machine learning with **TensorFlow**, **PyTorch**, and **Scikit-learn** for predictive analytics and automation. Strong background in microservices and cloud-native deployments with **Docker**, **Kubernetes**, and **AWS**. Proficient in database optimization (PostgreSQL, MongoDB, Redis) and integrating third-party platforms (Stripe, Twilio, AWS S3).

SKILLS

Languages & Frameworks:
Python(Django,Flask,FastAPI, Django Rest Framework, Jinja2), JavaScript (React.js, Vue.js, Node.js), TypeScript, HTML5, CSS3, Sass

AI/ML: TensorFlow,Ansible, PyTorch, Scikit-Learn, Keras, Transformers (Hugging Face), NLTK, OpenCV, Pandas, NumPy, Matplotlib

Databases: PostgreSQL,MySQL, MongoDB, Redis, SQLite, Google BigQuery, Snowflake, Cassandra

Frontend Tools:React.js,Vue.js, Angular, Bootstrap, Tailwind CSS, Chart.js, D3.js

Cloud Platforms & Tools:
AWS(Lambda, EC2,S3,RDS, SageMaker, DynamoDB, API Gateway, CloudWatch, Elastic Beanstalk, CloudFormation), Google Cloud Platform (GCP AI, BigQuery, Cloud Functions), Microsoft Azure (Azure ML Studio, Blob Storage, Azure Functions)

DevOps & CI/CD Tools:Docker, Kubernetes, Ansible, Terraform, GitHub Actions, Jenkins, CircleCI, TravisCI, Packer, Helm

Other Tools & Libraries:
Celery, RabbitMQ,RESTfulAPIs, GraphQL, WebSockets, OpenAPI/Swagger, BeautifulSoup, Scrapy, Regex, JSON/XML, Pytest, Apache Spark, Apache Airflow

PROFESSIONAL EXPERIENCE

Dell Technologies — Round Rock, Texas

Senior Software Engineer — 10/2022 - 12/2025

- Engineered scalable Django and FastAPI platforms serving **over 4K users daily**, improving system **responsiveness by 30%** through Redis caching and query optimization.
- Developed robust REST APIs and asynchronous microservices, **reducing latency by 25%** and enhancing inter-service communication efficiency.
- Designed and deployed AI-powered recommendation systems and NLP features using TensorFlow, PyTorch, and Hugging Face, increasing user engagement and **chatbot accuracy to 95%**.
- Built React.js dashboards and multistep onboarding flows for **over 100K enterprise users**, reducing user friction and support requests.
- Collaborated with UX teams to deliver fully responsive SPAs using Tailwind CSS and Storybook, ensuring accessibility and consistent brand design.
- Automated CI/CD pipelines with Docker and Kubernetes, enabling zero-downtime deployments and **scaling to over 1 million concurrent requests**.
- Drove testing best practices with Pytest, **achieving 98% coverage** and reducing **regression incidents by 40%.**
- Deployed machine learning pipelines on AWS SageMaker, reducing model **release times by 20%** and improving reliability.
- Delivered a Django-based e-commerce platform with AI-driven recommendations, **resulting in a 21% increase in sales conversions**.

PROFESSIONAL EXPERIENCE

Innova Solutions
Atlanta, GA

Full Stack Developer
06/2018 - 10/2022

- Designed **Flask** dashboards to process **over 1 million IoT records per day**, translating sensor data into actionable insights for clients.
- Automated financial forecasting with **Scikit-Learn**, reducing manual **reporting time by more than 20 hours weekly**.
- Integrated Flask APIs with CRM systems, enabling over **20K transactions daily with 99.9% uptime.**
- Optimized SQL and NoSQL performance, **reducing query times by 40%** and improving reporting latency.
- Built **TensorFlow**-based fraud detection systems, **preventing over $50,000 in monthly losses**.
- Deployed containerized services via AWS ECS, **lowering infrastructure costs by 15% through dynamic scaling**.
- Unified Flask APIs and React.js frontends, delivering a consistent user experience across devices and use cases.
- Migrated CI/CD pipelines to GitHub Actions, **decreasing release time by 20%**.
- Architected multi-region AWS deployments supporting three-minute disaster recovery for business continuity.
- Streamlined ETL and aggregation pipelines with Python multiprocessing, **accelerating data throughput by 23%**.

Crum & Forster
Houston, TX

Backend Developer
04/2014 - 06/2018

- Managed AWS and Azure cloud infrastructure, **maintaining 99.9% uptime** through proactive monitoring and automated backups.
- Built predictive ML and clustering models in Scikit-learn, optimizing customer segmentation and **boosting revenue by 21%**.
- Automated ETL pipelines to cut **processing time from 8 hours to 90 minutes**, improving data availability for analytics teams.
- Migrated monolithic Django applications to FastAPI microservices, **enhancing deployment agility by 56%**.
- Implemented serverless workflows with AWS Lambda, **reducing operational costs by 15%**.
- Improved object detection and fraud models with PyTorch, reducing false positives and **operational risk by 20%**.
- Leveraged Apache Spark for big data processing, **accelerating insights and analytics pipelines by 30%**.

EDUCATION

Texas Tech University
Lubbock, TX

B.Sc. in Computer Science
2010 - 2014
